

# LAPORAN ASESMEN

Technical Assessment — Arini Kusumawati

---

**Nama: Arini Kusumawati | Jabatan: Data Engineer**

**Skor Total: 82/100**

# Technical Assessment Report

\*\*Candidate Name:\*\* Arini Kusumawati

\*\*Role:\*\* Data Engineer

\*\*Score:\*\* 82/100

\*\*Key Skills Tested:\*\* Apache Spark, dbt, Apache Airflow

## Score Breakdown

| Category | Score (out of 100) |

|-----|-----|

| Apache Spark | 85 |

| dbt | 80 |

| Apache Airflow | 78 |

| Practical Application | 82 |

## Strengths Observed

- **Proficiency in Apache Spark:** Arini demonstrated a strong understanding of Spark's core concepts, efficiently implementing data processing tasks and optimizing performance.
- **Solid dbt Knowledge:** She showed capability in utilizing dbt for data transformation, including creating models and managing dependencies effectively.
- **Understanding of Workflow Management:** Arini showcased a good grasp of Apache Airflow, specifically in designing and scheduling data pipelines, indicating a clear understanding of workflow orchestration.

## Areas for Improvement

- **Advanced Airflow Features:** While competent in basic Airflow functionalities, further exploration of advanced features like dynamic task generation and XCom usage could enhance her workflow management skills.
- **Error Handling and Debugging:** Arini can benefit from strengthening her skills in troubleshooting and error handling within data pipelines, which will improve the robustness of her data engineering solutions.

## Overall Recommendation

Arini Kusumawati has demonstrated a solid foundation in the key skills required for the Data Engineer role, scoring 82 out of 100. Her strengths in Apache Spark and dbt, along with a good understanding of Apache Airflow, make her a valuable candidate for data engineering tasks. With targeted improvements in advanced Airflow functionalities and debugging techniques, she has the potential to further excel in this field. It is recommended to consider her for the position, with a focus on continuous learning in the identified areas for growth.
