

LAPORAN ASESMEN

Technical Assessment — Bagas Prasetyo

Nama: Bagas Prasetyo | Jabatan: Backend Developer

Skor Total: 75/100

Technical Assessment Report

Candidate Name: Bagas Prasetyo

Role: Backend Developer

Score: 75/100

Key Skills Tested: Java, Spring Boot, Kubernetes

Score Breakdown

| Category | Score (out of 25) |

|-----|-----|

| Java | 20 |

| Spring Boot | 25 |

| Kubernetes | 15 |

| Problem-Solving Skills | 15 |

| **Total** | **75** |

Strengths Observed

- **Proficiency in Spring Boot:** Bagas demonstrated a strong understanding of Spring Boot, effectively utilizing its features to build robust applications.
- **Java Fundamentals:** He showcased solid knowledge of Java, including best practices in coding and design patterns.
- **Problem-Solving Skills:** The candidate exhibited good analytical skills, successfully troubleshooting issues during the assessment.

Areas for Improvement

- **Kubernetes Knowledge:** While he has basic knowledge of Kubernetes, there is room for improvement, particularly in understanding deployment strategies and scaling applications.
- **Advanced Spring Features:** Bagas could benefit from further exploration of advanced Spring features, such as Spring Security and Spring Cloud, to enhance his backend development capabilities.

Overall Recommendation

Bagas Prasetyo is a competent candidate for the Backend Developer role, with a solid foundation in Java and Spring Boot. While there are areas that require further development, particularly in Kubernetes and advanced Spring features, his strengths in problem-solving and core backend technologies make him a valuable addition to the team. It is recommended to consider hiring him with a structured onboarding plan focused on his areas for improvement.
