

LAPORAN ASESMEN

Technical Assessment — Citra Dewi Lestari

Nama: Citra Dewi Lestari | Jabatan: Cloud Infrastructure Engineer

Skor Total: 79/100

Technical Assessment Report

Candidate Name: Citra Dewi Lestari

Role: Cloud Infrastructure Engineer

Score: 79/100

Key Skills Tested: AWS, Terraform, Kubernetes

Score Breakdown

| Category | Score (out of 100) |

|-----|-----|

| AWS | 80 |

| Terraform | 75 |

| Kubernetes | 78 |

| Problem-Solving Skills| 80 |

Strengths Observed

- **Proficient in AWS Services:** Citra demonstrated a solid understanding of AWS services, including EC2, S3, and IAM, showcasing the ability to design and implement scalable cloud solutions.
- **Terraform Expertise:** She effectively utilized Terraform to manage infrastructure as code, demonstrating a clear grasp of best practices in provisioning and managing resources.
- **Strong Problem-Solving Skills:** Citra exhibited strong analytical abilities in troubleshooting and resolving issues, particularly in cloud deployment scenarios.

Areas for Improvement

- **Kubernetes Deep Dive:** While Citra showed a good foundational knowledge of Kubernetes, further exploration into advanced topics such as custom resource definitions and scaling strategies would enhance her expertise.
- **Documentation Practices:** Improving documentation skills, especially around infrastructure setup and configurations, would greatly benefit collaborative efforts and knowledge transfer within the team.

Overall Recommendation

Citra Dewi Lestari has demonstrated a strong foundation in key areas relevant to the Cloud Infrastructure Engineer role, particularly in AWS and Terraform. With a score of 79/100, she is well-equipped to contribute effectively to cloud infrastructure projects. Focusing on advanced Kubernetes concepts and enhancing documentation practices will further solidify her capabilities. Therefore, I recommend considering her for the position, with an emphasis on ongoing training and development in the identified areas for improvement.
