Technical Assessment — Dimas Wahyu Nugroho

Nama: Dimas Wahyu Nugroho | Jabatan: DevOps Engineer

Skor Total: 71/100

Technical Assessment Report

Name: Dimas Wahyu Nugroho

Role: DevOps Engineer

Score: 71/100

Key Skills Tested: Docker, Kubernetes, Jenkins

Score Breakdown

| Category | Score (out of 100) |

|-----|-----|

| Docker | 75 |

| Kubernetes | 70 |

| Jenkins | 65 |

| Overall Knowledge | 72 |

Strengths Observed

- **Proficient in Docker:** Dimas demonstrated a solid understanding of containerization concepts and effectively utilized Docker for application deployment and management.
- **Kubernetes Fundamentals:** He showed a strong grasp of Kubernetes architecture and components, successfully managing basic deployments and services.
- **CI/CD Pipeline Awareness:** Dimas has a good understanding of CI/CD practices and how Jenkins can be integrated into the deployment workflow.

Areas for Improvement

- **Advanced Jenkins Features:** While Dimas is familiar with the core functionalities of Jenkins, he can benefit from further learning about advanced features such as pipeline as code, plugins, and best practices for scalable CI/CD implementations.
- **Kubernetes Troubleshooting:** Dimas needs to enhance his troubleshooting skills in Kubernetes to quickly identify and resolve issues that may arise during application deployment or scaling.

Overall Recommendation

Dimas Wahyu Nugroho shows promising potential as a DevOps Engineer, with a solid foundation in Docker and Kubernetes. His understanding of CI/CD practices is commendable, but there is room for improvement in advanced Jenkins capabilities and Kubernetes troubleshooting. With targeted training and experience, he can become a valuable asset to any DevOps team. It is recommended to provide him with opportunities for hands-on projects and mentorship in these areas to further enhance his skills.
