Technical Assessment — Eka Fitriani Putri

Nama: Eka Fitriani Putri | Jabatan: Cybersecurity Analyst

Skor Total: 90/100

Technical Assessment Report

Candidate Name: Eka Fitriani Putri

Role: Cybersecurity Analyst

Score: 90/100

Score Breakdown

| Category | Score (Out of 100) |

|-----|-----|

| Penetration Testing | 92 |

| SIEM | 88 |

| Firewall | 90 |

| Overall Knowledge | 90 |

Strengths Observed

- **Proficient in Penetration Testing:** Eka demonstrated advanced skills in identifying vulnerabilities and exploiting them in real-world scenarios, showcasing a strong understanding of various penetration testing methodologies.
- **Strong SIEM Analysis:** She exhibited excellent capabilities in analyzing security events and logs, effectively correlating data to identify potential security incidents.
- **Firewall Configuration Expertise:** Eka showed a solid understanding of firewall configurations and best practices, successfully implementing rules that enhance network security.

Areas for Improvement

- **Documentation Practices:** While Eka's technical skills are commendable, enhancing her documentation and reporting skills would improve clarity and communication of findings to stakeholders.
- **Incident Response Procedures:** Developing a more comprehensive understanding of incident response protocols and methodologies could further strengthen her overall effectiveness in the cybersecurity role.

Overall Recommendation

Eka Fitriani Putri is a highly capable candidate for the Cybersecurity Analyst position, scoring an impressive 90 out of 100. Her strengths in penetration testing, SIEM analysis, and firewall management make her a valuable asset to any cybersecurity team. Addressing her documentation practices and furthering her knowledge in incident response will enhance her overall performance. It is recommended to proceed with hiring Eka for the position, with a focus on continuous professional development in the identified areas for improvement.
